SIP's NEW PROFESSIONAL RANGE OF BOOSTERS

Industrial quality over 3 technology applications

AGM (ABSORBENT GLASS MAT) BOOSTER PACKS

AGM (Absorbent Glass Mat) batteries are a specific type of sealed lead acid battery (SLA) that uses a combination of lead plates and sulphuric acid absorbed into a fine fibreglass mat.

Advantages:

- Purpose-designed & manufactured batteries
 - high cranking rate
- Robust ABS Casing
 - shockproof
- Quality leads & clamps
 - increased performance
- Proven technology
 - reliability

CAPACITOR BOOSTER PACKS

Also known as Ultracapacitors, are a type of advanced capacitor that sees use in high amperage frequent charge/discharge applications such as 'Start/Stop' vehicles and regenerative braking systems.

Advantages:

- High current superconductor design
- Maintenance-free
 - unlimited shelf life
- Fast recharge
 - 15 seconds from a running vehicle
- Long product lifespan
 - over 1 million life cycles
- Lightweight
 - range from 4 to 20kg

HYBRID (AGM/CAPACITOR) BOOSTER PACKS

Hybrid Start Boosters combine both AGM batteries and Ultracapacitors to create a 'best of both' system that capitalises on the advantages of both technologies.

Advantages:

- Combined superconductor / AGM battery design
- Hybrid design
 - increased cranking duration via AGM battery
 - High current capacitor boost
- Lighter weight
 - compared to normal AGM packs (9 - 13kg)
- Longer AGM battery life
 - capacitors provide engine crank
 - AGM battery charges capacitors

A COMPREHENSIVE RANGE OF BOOSTERS TO CHOOSE FROM

SIP PROFESSIONAL FX WELDING FUME EXTRACTORS

The SIP comprehensive range of Welding Fume Extractors are manufactured to comply with the current regulations for all weldable materials including Mild Steel.

These Local Exhaust Ventilators (LEV) ensure that the welding fumes released are adequately controlled providing protection against harmful toxic fumes.

All models are manufactured in Italy and constructed from Heavy Duty steel, finished with a durable powder coating.

SIP PETROL INVERTER POWER GENERATORS

Why Choose an SIP Inverter Generator?

Clean and Stable Power Supply:

Thanks to digital inverter technology, these models deliver a reliable power source suitable to run laptop computers and other electrical devices - perfect for site offices, boats and caravans.

Economy Control Switch:

Varies engine speed according to load for increased fuel economy.

Quiet, Lightweight and Highly Portable:

SIP inverter generators are considerably quieter than traditional generators. They are also smaller and lighter increasing portability.

Economical and Friendlier to the Environment:

SIP inverter generators have a 30 - 40% lower fuel consumption rate, making them super economical and more eco-friendly compared to traditional generators.

- The output is "Pure Sine Wave"
- USB sockets can be used at same time as 230v output
- EURO V engines
- Thermally protected
- Oil alert system
- Forced air cooling

SIP PROFESSIONAL BELT-DRIVEN LOW NOISE PISTON AIR COMPRESSORS

Product features and benefits include:

SIP low-noise compressors are designed to give you powerful performance but with a fraction of the noise.

These Italian-made compressors are an excellent addition to any workshop where the installation is required close to the workspace.

Why Choose a Low-Noise Compressor from SIP?

- Low noise - for large air volume requirements with the lowest possible noise levels
- The pump and motor on these compressors are enclosed in an acoustic chamber - reducing sound levels to between 64dB(A) and 69dB(A)

ACOUSTIC CHAMBER
REDUCES NOISE LEVELS
